This is a Multiple choice, closed book, no calculator exam. You may use a $5^{\prime \prime} \times 8^{\prime \prime}$ card. Show all your work.

PUT YOUR ANSWERS ON THE ANSWER SHEET (page 19). Next to the number for each problem circle your letter answer (for example if your answer to problem 11 is $A$ circle the letter $A$ next to 11 on the answer sheet). Make sure that you give an answer for each question and that you have circled the letter that you intended to!

There is a table for the area under the standard normal distribution at the end of the exam that you may need.
